

Storage and Disposal

Store product at or below room temperature and out of reach of children. For longer-term storage of more than one month, refrigeration or freezing is recommended. Dispose of product and packaging by wrapping in newspaper and throwing in the trash.

Precautions

Although the product contains no pesticides and is not known to be toxic, place out of the reach of children. It is recommended to wear gloves when handling to avoid getting product odor on skin. If product contacts skin, wash with soap and water.

multi-moth lure

Contains Pheromones

Indian Meal Moths
Tobacco Moths
Almond Moths
Mediterranean Flour Moths
Raisin Moths

Excessive Heat May Damage Product

**Contents:
12 lures**

Use Directions - InVite Multi-Moth Lure

For Moths:

1. Open the D-Sect Station (see directions in the D-Sect Station carton). Remove the release paper from a Glueboard and place the Glueboard in the Station.
2. Remove an InVite Multi-Moth Lure from its wrapper and place it on the Glueboard. Put the cover on the D-Sect station.
3. The InVite Multi-Moth Lure may also be used on any glueboard. Fold-up type glueboards will be better at keeping dust off the glue.

Placement:

Place the Station on walls or shelving etc. and secure if needed using Hercules Putty, Liquid Nails, double-sided tape, screws, nails, Velcro, Dual-Lock, wire or construction adhesive. The Station can also be hung using wire through one or more of the pre-drilled corner holes. The cover of the Station can be removed for servicing even if the base is secured down. The InVite Multi-Moth Lures will remain active for 8 weeks, or longer in cool areas.

Use Tips:

1. Place Stations a little above eye level, preferably near or on walls, since adult moths often rest on walls.
2. Moths fly more in warmer temperatures, so place Stations in areas above 60 °F, preferably in areas with some air movement.
3. The sex pheromone will draw male moths from 30-50 feet away, or further if there is good air flow. In warehouses, place Stations in a grid pattern every 50-100 feet.
